DETAILED ACTION

1. Claims 1,4-13,16-24,26,28-45,48-52,54 and 56-62 are pending in the current application.

Interview Summary

2. During an telephone interview with applicant's representative, Mr. Rodney Johnson, on 6/9/2005, examiner noted the pending claims are allowable over the prior art, but the claims remain would be rejected under 35 USC § 101 and 35 USC § 112 second paragraph. Mr. Rodney Johnson requested a written rejection for the claims.

Response to Arguments

3. Applicant's arguments with respect to the claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

4. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

5. Claim 41 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
6. Claim 41 recites the limitation "the user application" in line 10. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 101

7. 35 U.S.C. 101 reads as follows:

Whoever invents or discovers any new and useful process, machine, manufacture, or composition of matter, or any new and useful improvement thereof, may obtain a patent therefor, subject to the conditions and requirements of this title.

8. Claims 1,4-13,16-24,26,28-45,48-52,54 and 56-62 rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

9. Claims 1, 4-11, 19-24, 26, 28-39, 42 and 43 are directed to method steps which can be practiced mentally in conjunction with pen and paper, therefore they are directed to non-statutory subject matter. Specifically, as claimed, it is uncertain what performs each of the claimed method steps. Moreover, each of the claimed steps, inter alia, providing, querying, determining, returning, selecting, evaluating, halting, assessing and requesting, can be practiced mentally in conjunctions with pen and paper. The claimed steps do not define a machine or computer implemented process [see MPEP 2106]. Therefore, the claimed invention is directed to non-statutory subject matter. (The examiner suggests applicant to change "method" to "computer implemented method" in the preamble to overcome the outstanding 35 U.S.C. 101 rejection).

10. Claims 12, 40 and 57 – 62 are not limited to tangible embodiments. In view of Applicant's disclosure, specification page 18, lines 1 – 5, the medium is not limited to tangible embodiments, instead being defined as including both tangible embodiments (e.g., device, such as a hard drive device, a CD-ROM, a DVD-ROM, or a computer diskette, having computer readable program code segments stored thereon) and

Art Unit: 2194

intangible embodiments (e.g., readable medium can also include a communications or transmission medium, such as a bus or a communications link, either optical, wired, or wireless, having program code segments carried thereon as digital or analog data signals). As such, the claim is not limited to statutory subject matter and is therefore non-statutory. To overcome this type of 101 rejection the claims need to be amended to include only the physical computer media and not a transmission media or other intangible or non-functional media.

11. Claims 13, 16-18, 41, 44, 45, 48-52, 54 and 56 are rejected under 35 U.S.C. 101 because the claimed invention is directed to non-statutory subject matter.

Claims 13, 16-18, 41, 44, 45, 48-52, 54 and 56 are not tangibly embodied in a manner so as to be executable because the only hardware is in an intended use statement. Although the operations defined in these claims may include hardware, the claims are not tangibly embodied because it is the intent of the execution of the system and not the system itself that includes such hardware.
